The 18th All India Conference of China Studies

Theme:
Rewiring Globalization—
The China Factor in Trade, Technology,
and Sustainability in a Multipolar World

October 24-26, 2025

ABOUT

ALL INDIA CONFERENCE OF CHINA STUDIES (AICCS)

The Institute of Chinese Studies (ICS) has been organizing the All India Conference of China Studies (AICCS) as a flagship event since 2006. Convened annually, usually in November or December, in partnership with an institution where research and teaching in China Studies are being carried out, it aims to generate interest in and strengthen research on China Studies in India.

In addition to a special theme each year, the conference also features a survey of recent scholarship in various aspects of China Studies, both globally and in India. As a pan-Indian outreach initiative, the previous editions of AICCS have been held in Delhi (2006 & 2009), Jadavpur University (2010), Central University of Hyderabad (2011), Visva-Bharati University (2012 & 2021), IIM Kozhikode (2013), Banaras Hindu University (2014), Sikkim University (2015), University of Mumbai (2016), Goa University (2017), CHRIST University (2018), O.P. Jindal Global University (2019), IIT Madras (2021), IIT Guwahati (2022), and Central University of Hyderabad (2023).

Each year, the best paper presented by a young and emerging scholar is selected for the Mira Sinha-Bhattacharjee Award, established in memory of one of India's most distinguished scholars of China Studies. The Award carries a prize of 25,000 INR, and the selected paper is published by the ICS. The selection is made by a committee comprising senior China scholars, based on originality of the topic, methodology, argument, and presentation.

CONCEPT NOTE

The Institute of Chinese Studies (ICS), New Delhi, in collaboration with the Indian Institute of Management Indore, is organising the 18th All India Conference of China Studies (AICCS) from October 24-26, 2025. The AICCS has been a flagship event of the ICS since 2006. This year's special theme is 'Rewiring Globalization: The China Factor in Trade, Technology, and Sustainability in a Multipolar World'.

The AICCS embodies contemporary, emergent scholarship from universities and research institutions on Chinese studies. Convened annually in partnership with an institution engaged in research and teaching in China Studies, this premier conference continues to generate interest in and strengthen research on China Studies in India.

The conference focuses on the opportunities and challenges arising from the evolving dynamics of trade, technology, and sustainability in the global landscape. It also aims to explore how these shifts impact India's strategic and economic interests, particularly in the context of changing global power structures and interdependencies.

Over the past decade, China's integration into the global economy has influenced international trade, technology, and supply chains. Its 'Beijing Consensus' model—rooted in state-led economic strategies, targeted industrial policies, and region-specific growth—has played a key role in its rise across sectors like emerging technologies, renewable energy, and manufacturing. Initiatives like the Belt and Road Initiative (BRI) have extended China's economic influence, reshaping supply chains and economic diplomacy. Furthermore, China's 14th Five-Year Plan emphasizes significant investments in climate change mitigation and the digital economy.

However, these developments have raised concerns globally, with issues such as trade tensions, supply chain vulnerabilities, and technological dependencies emerging. China's dominance in renewable energy has also sparked debates on sustainability and the risks of market concentration, affecting global climate goals and multilateral cooperation.

For India, these shifts present both challenges and strategic opportunities. As India charts its growth trajectory, it must address questions of economic security, technological resilience, and sustainable development in the face of rising global competition.

The AICCS provides a platform for scholars, policymakers, and industry leaders to assess these dynamics. It offers fresh perspectives on how India can strengthen its position in the global order, build resilient supply chains, and promote sustainable growth.

The sub-themes include, but are not limited to, the following: China's Foreign Policy and Diplomacy (China and Indo-Pacific, China and South-East Asia, China and South Asia, China's Economic Diplomacy); Geopolitics of Technology: The China Factor; Power Contestations in a Multipolar World: India, China and the West; Culture, Society, and Religion in China; China's Domestic Politics; Future of India-China Economic Engagement; Renewable Energy and Global Supply Chains: The China Factor in the Future of Climate Change.
